

Workload-Optimized Performance and Power Efficiency Gains

Intel® Xeon® 6 does it all

Performance for today's acceleration and AI needs and scale-out to maximize investment, consolidate & save power

Trusted performance. Exceptional efficiency. Meet performance and density goals with a broad portfolio. Intel® Xeon® 6 gives you a single platform with processors that range from high AI performance to exceptional efficiency and cloud scalability.

Intel® Xeon® 6 introduces the best processors to meet your diverse performance and efficiency requirements. A new class of Efficient-cores (E-cores) delivers high core density and exceptional performance per watt, offering distinct advantages for cloud-scale workloads that demand high throughput. Performance-cores (P-cores) excel at the widest range of workloads and give you better AI performance than any other CPU. E-cores and P-cores have compatible architecture with a shared software stack and the largest ecosystem of hardware and software vendors, so you can find solutions to match any business need.

Designed for AI with trusted performance and exceptional efficiency

The latest 5th Gen Intel® Xeon® Processors, codenamed Emerald Rapids, share an

architectural platform with the previous generation CPU, designed to deliver significant improvements in performance, power efficiency, and security across a broad spectrum of data center workloads. With up to 64 cores, an expanded shared cache, increased UPI, and support for higher DDR5 memory speeds, along with 80 lanes of PCIe Gen 5 and compatibility with CXL types 1 and 2, these processors achieve remarkable performance per watt gains across various workloads. The 5th Gen Intel® Xeon® Processors excel in AI, database, networking, and HPC applications, boasting enhanced security technologies and Total Cost of Ownership (TCO) benefits. Importantly, they remain software and platform compatible with its predecessor, allowing customers to streamline testing and validation when deploying new systems.

Leverage with 5th Gen Intel® Xeon® Processors, customers can benefit from:

Grow and excel with workload-optimized performance:

With faster memory, enhanced I/O, and improved application performance, the 5th Gen Intel® Xeon® Processors can drive ROI, offering up to a 21% average performance gain at the same TDP compared to the previous generation.

Designed for AI:

Specifically crafted for AI applications, the 5th Gen Intel® Xeon® Processors boast built-in Intel® AI Engines - "Intel® Advanced Matrix Extensions (Intel® AMX)," which substantially enhances deep learning training, inference, and fine-tuning on models with up to 20 billion parameters.

Energy-Efficient Computing:

The 5th Gen Intel® Xeon® Processors achieve socket power savings, delivering more performance per core to lower costs and reduce carbon footprint with energy-efficient compute.

Trusted, Quality Solutions, and Security Features:

Customers can seamlessly upgrade from the previous generation to 5th Gen Intel® Xeon® Processors, maximizing uptime and operational efficiency with industry-leading quality, enhanced telemetry capabilities, and rigorous testing.

The 5th Gen Intel® Xeon® Processors also have the most built-in accelerators of any CPU on the market to accelerate the greatest range of workloads, including Intel® Advanced Matrix Extensions (Intel® AMX), Intel® Data Streaming Accelerator (Intel® DSA), Intel® QuickAssist Technology (Intel® QAT), Intel® Dynamic Load Balancer (Intel® DLB), Intel® In-Memory Analytics Accelerator (Intel® IAA), and Intel® Volume Management Device (Intel® VMD).

Software and workloads used in performance tests may have been optimized for performance only on Intel microprocessors. Performance tests are measured using specific computer systems, components, software, operations and functions. Any change to any of those factors may cause the results to vary.

TYAN® FT83B-B7149

4U2S GPU server platform designed for various parallel workloads

Model Number	FT83B-B7149
Enclosure Form Factor	4U (32.68" in depth)
Supported CPU	(2) Intel® Xeon® 6 Generation
Chipset	Broadcom PEX89104
Number of DIMM Slot	32 / 16+16
Memory Type (max. capacity)	Supporting up to 4TB RDIMM DDR5-6400 memory
RAID Support	RAID 0, 1, 10, 5 (Intel® VROC 8.6)
Networking	(1) 1000Base-T port dedicate for IPMI (Realtek® RTL8211FD-CG)
PCI Expansion Slots	(11) PCIe 5.0 x16 slots + (3) OCP v3.0 LAN mezzanine slot + (2) PCIe 4.0 x4 NVMe M.2 slots
Power Supply	(2+2) 2,700W (@220Vac) RPSU 80+ Titanium

Standard Model	# Storage Bay	# PCIe Slots	Networking
B7149F83BE8HR-N	(8) 2.5" hot-swap U.2	(11) PCIe 5.0 x16 + (2) M.2	(1) 1000Base-T (IPMI)
B7149F83BE8HR-G	(8) 2.5" hot-swap U.2	(11) PCIe 5.0 x16 + (2) M.2	(1) 1000Base-T (IPMI)

TYAN® GC73A-B5660

1U1S server platform designed for CSP compute/storage applications

Model Number	GC73A-B5660
Enclosure Form Factor	1U (28.9" in depth)
Supported CPU	(1) Intel® Xeon® 6 Generation
Chipset	N/A
Number of DIMM Slot	16
Memory Type (max. capacity)	Supporting up to 2TB RDIMM/LRDIMM DDR5-6400 memory
Storage Controller	N/A
RAID Support	RAID 0, 1, 10, 5 (Intel® VROC 8.6)
Networking	(1) 1000Base-T port dedicate for IPMI (Realtek® RTL8211FD-CG)
PCI Expansion Slots	(2) PCIe 5.0 x16 slots + (2) OCP v3.0 LAN mezzanine slots + (1) PCIe 4.0 x4 NVMe M.2 slots
Power Supply	(1+1) 1,300W (@220Vac) CRPS 80+ Titanium

Standard Model	# Storage Bay	# PCIe Slots	Networking
B6660G7AE12HR	(12) 2.5" hot-swap U.2	(2) PCIe 5.0 x16 + (2) M.2	(1) 1000Base-T (IPMI)

TYAN® S5662

Single-socket HPC server board for multiple GPU cards deployment

Processor	• (1) Intel® Xeon® 6 Generation
Memory	• (8) DDR5 DIMM slots
Expansion	• (5) PCIe 5.0 x16 slots • (2) NVMe M.2 slot
Storage	• (3) M.2 NVMe slots for U.2
Network	• (2) 25G SFP28 ports (Broadcom® 57502) • (2) 1000Base-T port (Intel® i210-AT) / share NIC for BMC
Video	• ASPEED AST2600 Integrated Graphics
Management	• ASPEED AST2600 iBMC w/ iKVM
Form Factor	• CEB 12" x 10.5"

Standard Model	SATA	NVMe	2.5GbE	GbE	Audio
S662GM3NRE-2V	-	(3) M.2 NVMe + (2) M.2	2	2	Yes
S662GMNRE	-	(3) M.2 NVMe + (2) M.2	-	2	Yes
